something which you might not have thought of as being for women, then you can be reassured that there is an existing database for females and that the remedy is readily available. If you are looking for a different company, though, please continue down to the bottom of the page. The vast majority of these companies are registered with the ICO and have extensive disclosures. Here are the details for Moonpig. Moonpig Claims Moonpig are a web hosting company who are fast becoming the new 'warbux' of the marketing world. Although not expressly for females, they do have a whole range of services that are designed specifically for women. Of course, it is possible to try and scrape these pages for data, but it is quite likely that they will not be forthcoming with a great deal of data. Moonpig believe that the fact they are a female-centric company is the reason that they have come to be seen as 'the darling of the business world.' Whilst this is a rare claim to make for a web hosting company in 2016, the precedent set by the web hosting industry is strong enough that it makes this claim seem credible. Service To start with, Moonpig offer their standard Shared Hosting packages at a relatively low cost. It is possible to buy a 3 month package for the price of £5 per month. Their standard shared hosting plans are certainly acceptable, and are capable of running the majority of websites without issue. What they need to be careful about is running large numbers of websites with only the shared hosting. In the past, some web hosts have not been very transparent about this, but Moonpig are different. Their hosting plan shows a number of 'load' numbers, and these demonstrate that the company are happy to run websites with large numbers of traffic. With standard shared hosting, you will notice that each of your websites will only be allocated a certain amount of bandwidth. This is to prevent one company from taking advantage of a host by building up a large amount of traffic and then leaving it all to go to the few websites which use a lot of bandwidth. Moonpig are much more transparent about this than some of their competitors. When you purchase a package of this nature, you have the option to define a number of 'cores,' which will, as the name implies, give each website dedicated resources. This is a nice touch

Star Bar and Grill Coming to an End of 2019 After 32 years, the iconic original location of Star Bar and Grill will permanently close its doors in December 2019. Founded in 1994, the long-time Salem, Oregon, favorite, more than 19 years, has been a staple in downtown's historic district. Its sunny courtyard is situated directly across from the historic Goodwin Mansion. Its late hours and stellar menu have made it a favorite for students, business professionals, and locals of all ages. While the owner's plan to open Star Canyons in the Creston area is not finalized, he hopes to leverage his more than 25 years of experience in the bar and grill industry to keep the doors of this beloved Salem icon open. "When this location closed, I knew we were going to open another location with the experience we have at this location," said the owner. "I love this location and the people who have been coming since the beginning of the business. A lot of good memories have been made." After a long-time owner has owned the restaurant, many residents have requested different changes and needed adjustments to the business model. After many attempts to improve the business and ensure the food and drinks remained exceptional, the owner decided the time was right to make the transition to a different model of business. "We have made the decision to close the location," the owner said. "It has been a great location for years. It just wasn't a good fit for the business." The location will remain open, in its current state, for a limited time to provide last orders for last purchases.I'm an equity markets analyst who covers stocks and financial-related ETFs.
